Complete Development Solutions
SUSTAINABILITY

Sustainable development takes into account practical design without destroying or degrading the natural environment. Traditionally, stormwater runoff has been viewed a nuisance to site design and development. The goal was to collect the stormwater as quickly as possible and remove it from the site. Over the last few years, the industry has begun to view stormwater as a resource. In addition to offering products with recycled content, ADS prides itself in providing cost effective options for sustainable stormwater solutions. Whether you are managing the release, reducing the quantity, improving the quality or harvesting rainwater, we provide a variety of solutions to achieve your goals.

Recycling & Recycled Content

Infiltration

Subsurface systems such as perforated pipes or chambers provide an opportunity for infiltration by allowing stormwater to come into contact with native soils. These systems also allow for longer periods of contact due to the greater detention volumes which can provide greater runoff reductions through longer infiltration times. Since these systems operate subsurface, infiltration can occur even when the surface is impervious.

Rainwater Harvesting

- Lightweight and easy to install
- Manufactured nationwide
- Multiple sizes available
- Unlike many plastic tanks ADS tanks and chambers are suitable for under pavement installations
- Cost competitive

Green Rating Systems

- Professionals on staff with accreditations from USGBC/LEED, ISI/Envision, and ARCSA/Rainwater Harvesting
- Members of USGBC
- Recycled Material Certifications available upon request
- Providing some of the lowest carbon footprint drainage products in the market
ADS: A WATER MANAGEMENT SOLUTIONS PROVIDER

Ticker: WMS
Since 2014

$1.3+ billion
Company revenue

8.5+ billion
Feet of ADS pipe in service around the world today

400+ million
Pounds of plastic recycled annually by ADS

50+
Year of providing solutions

1st in corrugated plastic pipe

350+
Total number of product solutions

4,400+
Solutions providers

OUR HISTORY

From the U.S. introduction and championing of corrugated plast drainage pipe to the development of N-12 dual wall pipe and HP Storm and SaniTite® HP sanitary sewer pipe, ADS has been an industry and water management solutions leader for more than 50 years. Our innovative pipes, fittings, basins and other solutions are used across a broad range of end markets and applications. We have established a leading position in many of our domestic and international end markets by leveraging our national sales and distribution platform, overall product breadth and scale, and manufacturing excellence. Founded in 1966, ADS currently operates a global solutions network of approximately 60 manufacturing plants and over 30 distribution centers with more than 8.5 billion feet of ADS pipe in service around the world today.

At ADS, we are proud of the success we’ve achieved and the solutions we’ve provided to an industry responsible for rebuilding infrastructure, protecting our water resources, and ultimately, improving our quality of life.
