HEAVY TRAFFIC DURASLOT® INSTALLATION

Heavy Traffic - surrounded by concrete for critical loading applications. This would include frequent high-speed, H-20 traffic (i.e. highways, loading docks, etc.). The 'S' dimension is generally 6" depending on the specific conditions for the project (design layout, traffic patterns, soil properties, etc.). Expansion joints and concrete and/or asphalt pavement is to be designed by others.

CONCRETE PER LOCAL SPECIFICATION FOR CURB & GUTTER

EXPANSION JOINT

ASPHALT OR CONCRETE PAVEMENT

GRANULAR SOIL COMPACTED TO 95% MODIFIED PROCTOR

BASE MATERIAL AS APPROPRIATE
