5. **BACKFILL AROUND THE UNIT AND BY-PASS**

- Ensure backfill between unit and bypass.
- Continue with Class I material per ASTM D2321 to 12" above unit*
- Compacted
- HDPE bypass pipe

**NOTES:**
1. Continue backfill with Class I material per ASTM D2321 to 12" above water quality unit.
2. Fill unit with water to the top of the sediment weir plate once backfill is placed and compacted 12" above the unit.

* For 60" units continue backfill with Class I material per ASTM D2321 to 24" above water quality unit.

6. **FINAL COVER AND RISER EXTENSIONS**

- Provide concrete collar extending at least 12" around grates/frames for traffic loading conditions.
- Match inverts.
- Ensure backfill between unit and bypass.
- NYLOPLAST in-line drain (optional).
- NYLOPLAST H-25 solid cover
- 8"
- Minimum final cover (H)
- Finished grade

**NOTES:**
1. Please follow the installation guidelines found in the ADS drainage handbook when installing ADS N-12 pipe on the by-pass connection or in other drainage applications on the site.
2. All riser extensions to grade should be coordinated through your ADS representative.

For non-traffic loading; H = 12" cover for 36", 42", and 48" units measured from the top of the pipe to the bottom of bituminous pavement or top of rigid pavement. H = 24" cover for 60" pipe.

For traffic loading H = 24" cover for 36", 42", 48", and 60" measured from the top of the pipe to the bottom of bituminous pavement or top of rigid pavement..
