The cast A-Seal connection is for use with square manholes only.

Settlement between the pipe and manhole must be taken to prevent differential expansion. A-S seal is uniformly seated around structure. Performance highly dependent on installation. Contractor must check revised detail T&D 2023.20 Technical Note 6.3A. More connections are required.

Notes:

1. The pipe size at the manhole connection is 30".60" triple wall sanitation HP.

2. Pre-Cast Water Tight connection using a manhole boot (corbel hole or pre-cast) water tight connection using a manhole.
